PROFESSIONAL SUMMARY

Full Stack Software Developer with a degree in Computer Science and a postgraduate degree in Full Stack Development. Experience developing and maintaining industrial ERP systems using Java, JavaScript, React, SQL and MySQL, working with tax and financial modules and banking integrations.

Experienced in investigating complex problems, analyzing business rules, fixing issues in legacy systems and implementing end-to-end features. Experience with Hibernate, APIs, bank file processing, Git, SVN and creating prototypes in Figma.

PROFESSIONAL EXPERIENCE

Front-end Developer & Automation Aug 2025 — Present

AutoCraft · Remote

- Develop front-end features, UI/UX, desktop applications and automation for products such as EZ Native, Viddz, CREDistributors and Leap Labour using React, React Native, FlutterFlow and n8n.

Junior Full Stack Developer Sep 2024 — Present

Nomus · Rio de Janeiro, Brazil (Remote)

- Develop and maintain end-to-end features in an industrial ERP using Java, JavaScript, JSP, React, Hibernate and MySQL, including legacy-system maintenance.
- Work on financial and tax modules, IBS/CBS-related adaptations and banking integrations involving file processing.
- Investigate bugs through code, logs, SQL and integration files; use Git, SVN and Figma.

Development Intern Jun 2023 — Sep 2024

Nomus · Rio de Janeiro, Brazil (Remote)

- Implemented improvements, fixed bugs and developed REST APIs with Java 8, while also working with JavaScript and jQuery on the front-end.

Support Analyst Sep 2021 — Dec 2024

CSU Digital · Recife, Brazil

Held concurrently with the Nomus role from Jun 2023 to Dec 2024.

- Resolved requests via chat and voice with Zendesk, Cisco and Avaya, prioritizing SLA and business impact; translated issues into tickets with reproduction steps, logs and evidence.

TECHNICAL SKILLS

Back-end: Java 8/17, Spring Boot, Hibernate, Python.
